HOW TO CREATE FAVORABLE LIVING CONDITIONS FOR RESIDENTS AND  
OUTSTAND COMPETITORS IN THE REAL ESTATE MARKET

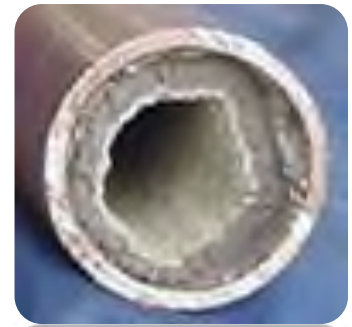

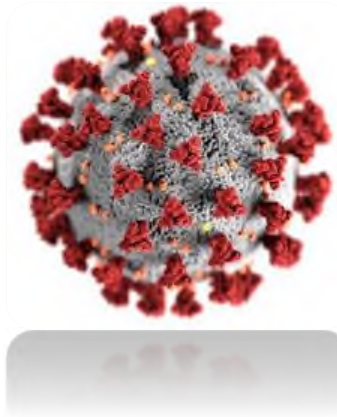

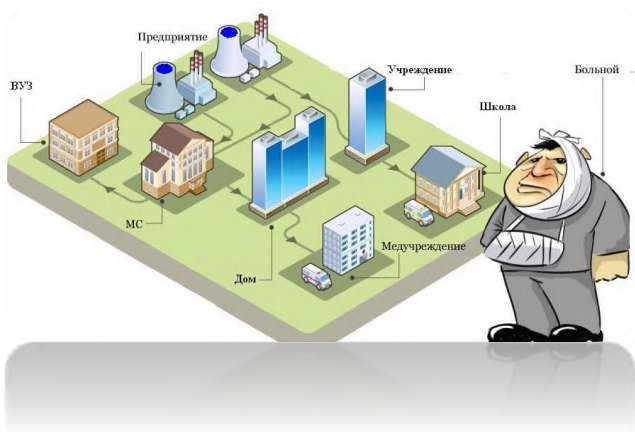

# PROJECT PURPOSE - ECO HOUSE

Creation of favorable and safe living conditions for residents in metropolitan areas and pandemic conditions, by nat. projects "Clean Water" and "Health"

**Social orientation - reducing the incidence rate :**

**The basis is resonance technologies and devices "IKAR"**

- **Disinfection, purification, softening of the incoming polluted tap water from the pipes of megalopolises and disinfection of the water leaving the RC;**
- **Preparation of drinking ionized water of the highest quality with antioxidant properties, given composition and properties: microelements  $\text{Ca}^{++}$ ,  $\text{Mg}^{++}$ , iodine ... pH, negative ORP and Resonant Microclusters;**
- **Disinfection, ionization and humidification in air conditioning systems for supply and exhaust ventilation, in houses, porches and apartments;**
- **AVIK-polyclinic for prevention, diagnosis and treatment with a guarantee.**

- 1. Fear of residents to use the water of the city water supply network (viruses, pollution).**
- 2. Lack of water purification and water ionization leads to illness of residents.**
- 3. Overgrowth of water supply pipes with sediments and microbes.**
- 4. Pollution and low air humidity, especially in the winter season, lead to diseases.**

# DECISION

- **Disinfection, purification, softening of the water ENTERING the residential complex from the city water supply network and disinfection of the water LEAVING the residential complex (sewage drains) by devices “IKAR” (mod. 2000).**
- **Purifier (reverse osmosis) with water activator and mineralizer in apartments “IKAR” (mod. 01os).**
- **ANK-VK injection in air conditioning and ventilation systems at home, automatic air humidifier connected to reverse osmosis in apartments.**
- **Wellness center for prevention, diagnosis and treatment with a guarantee based on resonant AVIC therapy.**

# PRIORITIES OF A CENTURY OF GLOBALIZATION

Basically, all over the world, wars arise over energy sources. According to experts, this problem has two aspects - access to oil sources and access to drinking water.

- ✓ Oil is the main source of energy for mechanical systems
- ✓ Water - for biological systems

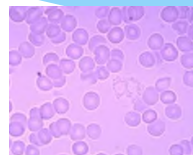

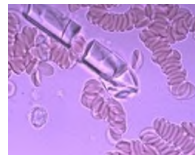

Poor quality water - leads to overgrowth of pipes, blood vessels and to damage and death of mechanical and biological systems.

# SCOPE OF USE

*Installations of the new generation "IKAR" mod.01os and mod.2000,  
The best in the world  
Guarantee of your safety for living in the residential complex*

Pipe cleaning

*Cleaning of blood vessels*

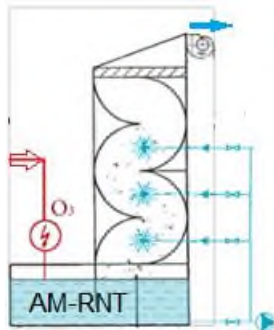

*Housing and communal services*

Drinking water

*Disinfection of water*

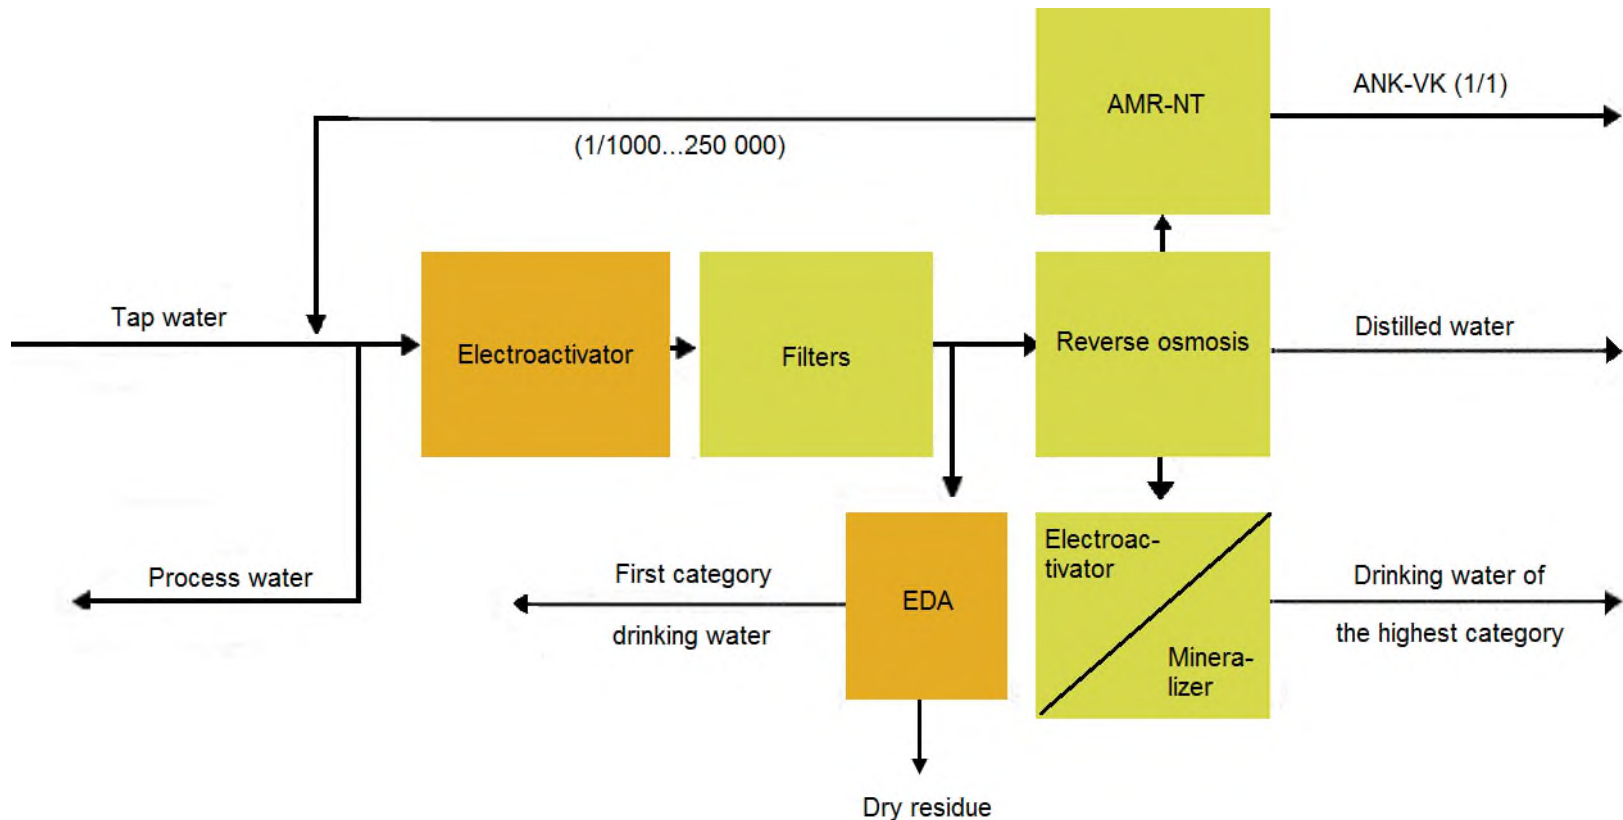

Cleaning, disinfection, humidification, air ionization  
and incoming-outgoing

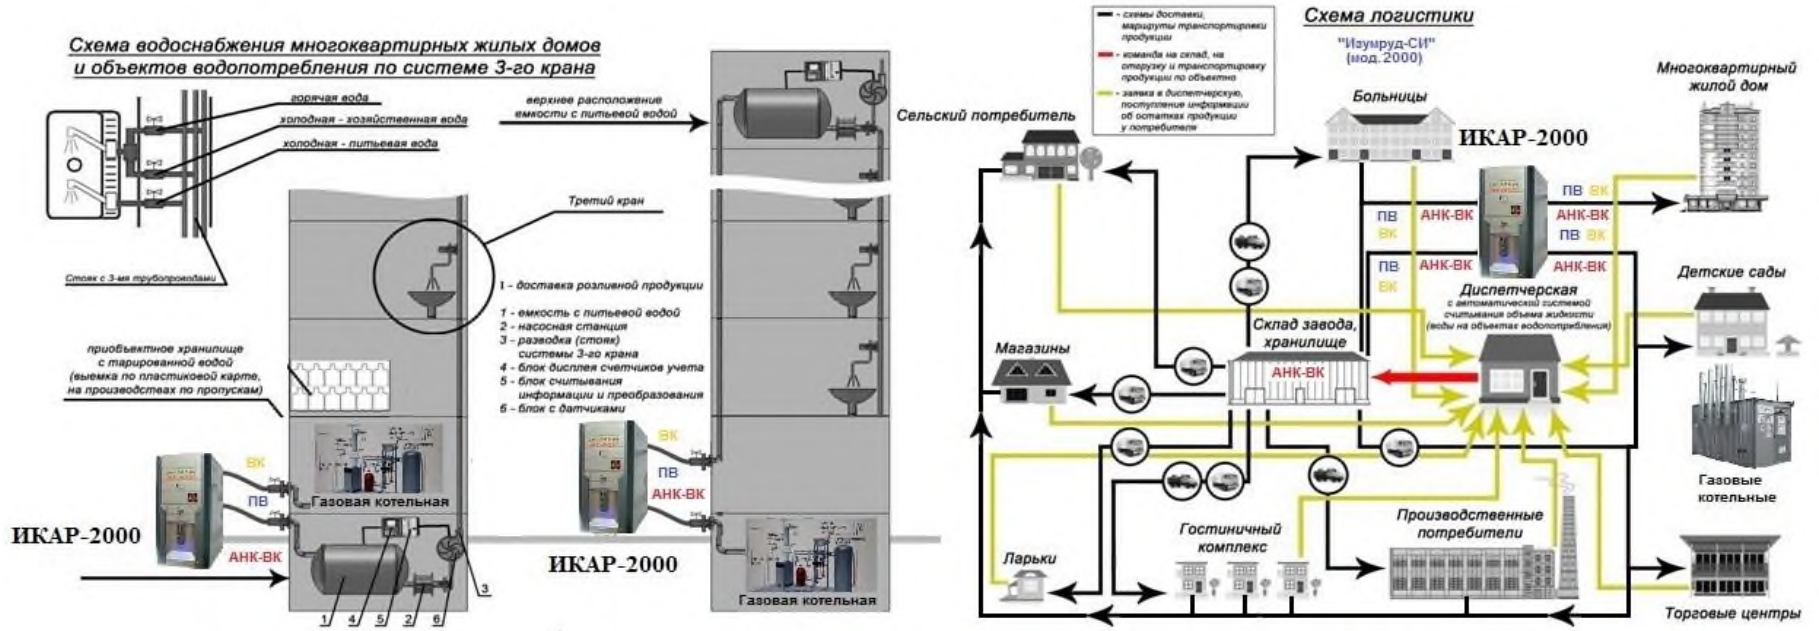

AVIK-polyclinic,  
treatment with a guarantee

- 1) Disinfection of tap water
- 2) Receiving (practically by waste-free technology):
  - drinking water of the first and highest category, ionized, biologically active;
  - distilled water;
  - disinfectant solutions based on ANK-VK (anolyte neutral cathode-treated of the highest quality).

# IKAR-2000

Devices “[IKAR](#)”, “[Л LUCH-Ts](#)”, “[EKOVESTA](#)” will solve the problem of clean air, drinking and industrial water for large gatherings of people, large and small cities, housing estates, villages, schools, preschool institutions, problems of disinfection, disinfection during periods of a pandemic.

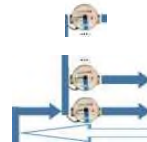

1. Polypropylene filter 5 mk
- 2, 7. Titanium membrane with auto flush
3. pH Big
4. Polypropylene filter 1 micron
5. H-filter with regeneration
6. Mixing unit
8. Multi-component backfill filter
9. Industrial osmosis
- 10, 11. IKAR (mod.2000)
- 12, 13. hydroaccumulators
- 14, 15. filling modules (optional)
16. CPU

1. Technical disinfected water.
2. Ionized drinking water of the highest quality.
3. Protection against scale and pipe overgrowth.

Чистка труб

To consumers  
Process water

Water inlet

Анолит

# THERE IS SOLUTION!!!

## DEVICES "IKAR" - "LUCH-TS" - "ECOVESTA"

Purification of water and air: from tap water pollution, dust, aerosols and pathogenic microflora, used in supply and exhaust ventilation systems with or without recirculation to process the extracted exhaust air, disinfect supply air and clean surfaces in order to create a comfortable and safe living environment.

Used for crowded places.

(mod. 01m)

(mod. 01os)

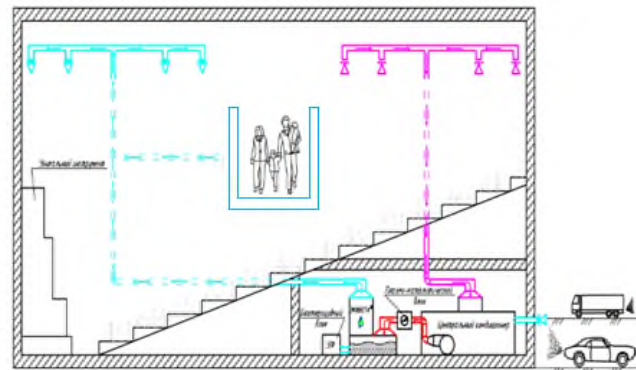

(mod.05)

(mod.05)

(mod. 2000)

"ECOVESTA ECOVESTA" + "IKAR" + "LUCH-Ts"

IKAR

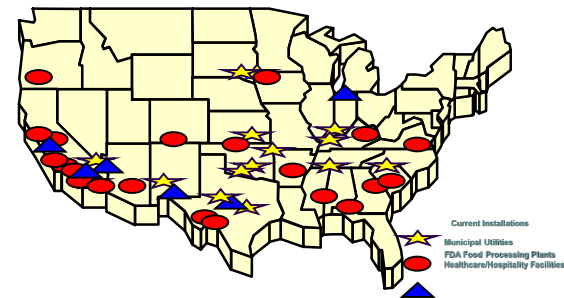

GRNT

# TECHNOLOGY OF DISINFECTION AND CLEANING OF WATER PIPES

Aqueous activated solutions are more than **300** times superior in bactericidal activity to sodium hypochlorite. The addition of **AM-RNT** to water for purification and disinfection of water, water pipes is **1: 250.000** (USA)

IKAR USA *Resonance*

# A FAIRY TALE BECOMES A REALITY

- 1) «... The gray wolf sprinkled it with dead water on Ivan Tsarevich's wounds, the wounds healed; sprinkled him with living water - Ivan Tsarevich came to life ... (" Ivan Tsarevich and the Gray Wolf "- Russian folk tale). FAIRY FOREST: fairy tale comes true.**
- 2) FANTASTIC FOREST: caring for the health of residents and nature in reality.**
- 3) FANTASTIC FOREST: a source of living water and clean air in every apartment.**

# STATE OF DEVELOPMENT

Developments are protected by certificates, testspatents,  
trademarks,international awards
